

Project 1 Milestone

Austin Spencer

1. One problem I encountered was figuring out how to read the command line argument. This was simple once figured out but it took me a long time to figure out how to do it without using a library. Another issue I was having was printing two empty lines when an empty line was given.
2. No known bugs
3. No incomplete implementation
4. No significant interactions
5. Citations:

Parsing command line arguments:

Version Control:

The screenshot shows a GitHub repository page for 'abspen1 / CSE-310-P1'. The repository is private and has 1 branch (master) and 0 tags. The file list includes:

File	Description	Time
.idea	c lion	2 days ago
adding-pointers	getting really close	10 hours ago
cmake-build-debug	encode working for both insertion and quick	2 days ago
large_input	add large i/o	2 days ago
medium_input	add medium i/o	2 days ago
small_input	getting really close	10 hours ago
small_output	adding more output	2 days ago
.gitignore	init	20 days ago
CMakeLists.txt	encode working for both insertion and quick	2 days ago
encode	getting really close	10 hours ago
encode.cpp	adding comments	9 hours ago
haiku1.txt	getting really close	10 hours ago
makefile	update makefile	2 days ago
out.txt	getting really close	10 hours ago
test	getting really close	10 hours ago
test.cpp	getting really close	10 hours ago
test.txt	getting really close	10 hours ago

The right sidebar shows the 'About' section with the project name 'Project number 1 for CSE 310'. Below it are sections for 'Releases' (no releases published), 'Packages' (no packages published), and 'Languages' (C++ 38.9%, C 26.7%, CMake 20.2%, Makefile 14.2%).
